## School Report

Assessments of Reading, Writing and Mathematics
Primary Division (Grades 1-3) and Junior Division (Grades 4-6), 2011-2012
School: St Agnes Sep S (765635)
Board: Toronto Catholic District School Board (67059)

EQAO is pleased to provide you with the results of the 2011-2012 Assessments of Reading, Writing and Mathematics for the primary division (Grades 1-3) and junior division (Grades 4-6). This report contains student results for the current year and previous years to help you track the progress of your student population over time. It also includes contextual and attitudinal information that can help you conduct in-depth analyses of student achievement.

By assessing all students in our education system at key stages in their education, EQAO's provincial testing program has been providing objective and reliable data that are an independent gauge of student learning. These data are used as a catalyst for improvement at the individual student level through to the school, school-board and ministry levels. They provide a clearer picture of student progress and a solid foundation upon which parents, policymakers, school and school-board staff can base their strategies to support students in their learning.

EQAO data help school teams identify areas of student strength, target areas requiring support and plan for improvement. They also provide additional evidence that helps teachers and parents engage in meaningful conversations about individual students' achievement. At the school-board level, EQAO data are used by directors of education as a key source of student-achievement information to create annual school-board reports and by trustees to establish multi-year school-board plans. Since 2009, school boards have also been required by legislation to consult with school councils on policies and guidelines related to student achievement, and EQAO data support these conversations as well.

Of course, it should be remembered that EQAO data are just one part of the picture. Provincial test results are a valuable indicator of student achievement and should always be examined together with other achievement information-such as report card grades and classroom assessment results-in order to get a complete picture of student skills, abilities and knowledge.

At EQAO, we are proud to support public accountability in education through our province-wide testing program and our strong partnerships with educators, school-board teams and parents. I trust the powerful information contained in this report will continue to support efforts to help all students reach their highest potential.

Sincerely,
Marquecicte factern

## Marguerite Jackson

## TIPS

Each school or board is unique. To appreciate the distinctive character of a school or board, look at the contextual information to understand the features and characteristics of the community it serves.

## 03

Every assessment captures the performance of students at one point in time each year. Consider the results along with other information about students' achievement in reading, writing and mathematics.

## cos

Exercise caution when interpreting results for small schools or boards. Results may vary considerably from year to year, and differences may look exaggerated. For example, in a school of 20 students, a difference of $10 \%$ represents only two students.

## 08

Trends may be difficult to identify or to interpret. This is especially true in small schools or boards, or in schools where there is a high turnover in the student population.

## OS

EQAO values students' privacy. Results are not reported publicly for schools where fewer than 15 students participated, because it might be possible to identify individual students.

## ABOUT THIS SCHOOL OR BOARD REPORT

This report shows how well students have met curriculum expectations to the end of the Primary Division and the end of the Junior Division. Students complete a set of test booklets that allow them to show what they have learned in reading, writing and mathematics. The assessments are based on The Ontario Curriculum.

## This report includes

- results for this year
- a comparison of results of the current and previous administrations to aid in monitoring improvement
- information about the characteristics of the students who participated
- summary graphs showing the percentage of students achieving the provincial standard in reading, writing and mathematics
- detailed tables and graphs showing results for all levels of achievement, results for gender and participation information
- student questionnaire results
- an explanation of all terms used in this report.

## HOW TO USE THIS REPORT

- Examine the contextual information to understand the similarities and differences between the school, the board and the province; the board and the province. Consider the challenges that any differences might present.
- Examine the results for reading, writing and mathematics.
- Are these results consistent with what you would expect?
- How do the school results compare to the board and the province; the board results compare to the province?
- How do these results compare over time?
- What influence might students' attitudes have on student performance (refer to the questionnaire results)?
- Speak to school or board staff about the goals for school improvement related to reading, writing and mathematics.

* Only includes students for whom gender data were available.
$\dagger$ Percentages may not add to 100 , due to rounding or to ambiguous responses or blanks.

## EXPLANATION OF TERMS

All Students Results are reported for all students in the grade.
Participating Results are reported only for those students who took part in the assessment (excludes "no data" Students and "exempt" categories).

Provincial The Ministry of Education has set Level 3 as the provincial standard. Standard

Level 4 The student has demonstrated the required knowledge and skills. Achievement surpasses the provincial standard.
Level 3 The student has demonstrated most of the required knowledge and skills. Achievement is at the provincial standard.
Level 2 The student has demonstrated some of the required knowledge and skills. Achievement approaches the provincial standard.
Level 1 The student has demonstrated some of the required knowledge and skills in limited ways. Achievement falls much below the provincial standard.
NE1 "Not enough evidence for Level 1" is used when students did not demonstrate enough evidence of knowledge and understanding to be assigned Level 1.
No Data Students who did not have a result due to absence or other reasons.
Exempt Students who were formally exempted from participation in one or more components of the assessment.

English Language Students who have been identified by the school in accordance with English Language Learners:
Learners ESL and ELD Programs and Services: Policies and Procedures for Ontario Elementary and Secondary Schools, Kindergarten to Grade 12 (2007).
English Language English language learners identified by the school as receiving a special provision. Detailed Learners Receiving information about special provisions is available in EQAO's Guide for Accommodations, Special a Special Provision Provisions and Exemptions.

Students with Students who have been formally identified by an Identification, Placement and Review Special Education Committee, as well as students who have an Individual Education Plan. Students whose sole Needs (excluding identified exceptionality is giftedness are not included. gifted)
Students Students identified by the school as receiving accommodations. Detailed information about Receiving accommodations is available in EQAO's Guide for Accommodations, Special Provisions and
One or More Exemptions.

## Accommodations

$\mathbf{N} / \mathbf{R}$ "Not reported" indicates that the number of students participating (fewer than 15 in a group) or responding to the Student Questionnaire is so small (fewer than six in a group) that identification of individual student results might be possible; therefore, results are not reported.
N/D "No data available" is used to indicate that there were no students in the grade or subject for the group or year specified.
W Results are being withheld by EQAO. For further information, please contact the school principal.

[^0]:    The Education Quality and Accountability Office is an independent agency that gathers information about student achievement through province-wide assessments. Each year, all Grade 3 and Grade 6 students across Ontario take part in these assessments of reading, writing and mathematics.
    Individual results are reported to students and to parents and guardians. School, board and provincial results are released publicly.

    Learn more about us at www.eqao.com.

[^1]:    * Because percentages in tables and graphs are rounded, percentages may not add to 100 .
    ** See the Explanation of Terms.
    $\dagger$ These percentages are based on the actual number of students and cannot be calculated simply by adding the rounded percentages of students at Levels 3 and 4 .

[^2]:    * Because percentages in tables are rounded, percentages may not add to 100 .
    ** See the Explanation of Terms.
    $\dagger$ These percentages are based on the actual number of students and cannot be calculated simply by adding the rounded percentages of students at Levels 3 and 4 .
    $\dagger \dagger$ Results include only students for whom gender data were available.

[^3]:    * Contextual data pertaining to gender, student status, place of birth, language learned at home and year entered school and board are provided by schools and/or boards through the Student Data Collection process. Some data may be missing because they were not provided by the school or the board.
    ** See the Explanation of Terms.

[^4]:    * Because percentages in tables and graphs are rounded, percentages may not add to 100 .
    ** See the Explanation of Terms.
